Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "15" has been used to designate both "slots" and "holes".

Also, see that it is not very clear what 15 points at. The examiner suggests that a new reference number is added such that distinct reference numbers clearly point out at either slots or holes.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 2 is objected to because of the following informalities: The claim is missing commas. This makes the scope of the claim hard to ascertain. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Golz (DE 100 14 306 A1).

Golz discloses (see cover figure and figure 3):

- A stress-free lead frame (1) comprising;
a plurality of integrated circuit areas (see Col. 3, lines 50-55; also see that multiple chips are **not** claimed, but multiple **IC areas** and that such can exist in a single chip), each of said plurality of integrated circuit areas having a die pad (see that “die pad” is a term used for the area wherein a “die” is disposed, also see that there is a die present as discussed above and therefore an inherent die pad wherever such is disposed) and a plurality of leads (4); and a peripheral pad (3, fig. 1) surrounding said plurality of integrated circuit areas, said peripheral pad (3) being provided with a plurality of stress-relief means (10).
- A stress-free lead frame (1) comprising;
a plurality of leads (4); and a peripheral pad (3) surrounding said plurality of integrated circuit areas, said peripheral pad (3) being provided with a plurality of interlocking means (area designed by numerals 8 and 9 between the two areas 7 on the left side of cover picture).

A stress-free lead frame (1):

- wherein said plurality of stress-relief means (10) comprises holes and slots, each hole being a non-elongated opening and each slot being an elongated opening (see that some holes are wider than others, figure 3).

- wherein said holes and slots are arranged in multiple rows (see that 7 is located in multiple sites of 1).
- wherein each of said interlocking means comprises a plurality of slots (see figure 1), each slot being an elongated opening.
- wherein said holes and slots are arranged side by side at equal intervals (see figure 1).

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new grounds of rejection presented above. Applicant's amendment necessitated the new grounds of rejection presented in this Office action.

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elle Cruz whose telephone number is 703-306-5691. The examiner can normally be reached on M-F 10-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Talbott can be reached on 703-305-9883. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
